PROFESSIONAL SUMMARY

AI/ML Engineer with hands-on experience in Data Science, Machine Learning, Generative AI, and Data Analytics. Proficient in Python, SQL, Power BI, and in developing end-to-end AI solutions using industry-standard tools and frameworks. Experienced in data preprocessing, feature engineering, predictive modelling, NLP, and interactive data visualisation. Skilled in deploying scalable machine learning applications using Streamlit, AWS, and Git. Passionate about leveraging AI and data-driven insights to solve real-world business challenges and deliver impactful solutions.

EXPERIENCE

Data Science Intern , Innomatics Research Lab Pune 05/2025 – Present

- Performed data preprocessing, EDA, and feature engineering for real-world ML use cases.
- Conducted data analysis and visualisation using Python, SQL, and Power BI for real-world projects.
- Created interactive dashboards to present findings, enhancing decision-making.

Python Developer (Django) , VidyaGXP Pvt.Ltd Indore 10/2024 – 01/2025

- Managed and queried MySQL databases for structured data handling and reporting.
- Developed data processing workflows using Django ORM for efficient data retrieval.
- Supported deployment and API integration for scalable backend services.

EDUCATION

Master of computer Application 10/2021 – 06/2023

SAGE University, Indore

BSC in Computer Science 07/2018 – 07/2021

DAVV University, Indore

SKILLS

Programming & Query Languages: Python, SQL

Machine Learning & Deep Learning: Scikit-learn, TensorFlow, Keras, PyTorch — Regression, Classification, Clustering, Ensemble Methods.

Generative AI & NLP: Gemini API, LangChain, Transformers, RAG, Prompt Engineering, TF-IDF, Sentiment Analysis, Tokenisation.

Libraries & Frameworks: NumPy, Pandas, Matplotlib, Seaborn, Streamlit, FastAPI, Django, Flask.

Tools & Platforms: Power BI, MySQL, Excel, JupyterLab, VS Code, Google Colab, AWS EC2, Git, GitHub.

Competencies: EDA, Feature Engineering, Model Evaluation, Data Visualisation, Dashboard Development.

PROJECTS

TechGuide – Gemini AI Assistant | Generative AI Project

- Built a domain-focused AI assistant using **Google Gemini API**, Python, and Streamlit to answer technical queries.
- Implemented **Prompt Engineering** and **Contextual Memory** to support accurate multi-turn conversations.
- Applied secure **API management** (.env) and optimised model settings for reliable AI responses.

Flipkart Sentiment Analysis | Machine Learning + Deployment

- Designed and deployed an **end-to-end NLP pipeline** for sentiment analysis on 8,500+ real-world e-commerce reviews.
- Implemented **TF-IDF-based feature extraction** and trained classification models using **Scikit-learn**.
- Built an interactive **Streamlit** application for real-time inference and user input handling.
- Deployed on **AWS EC2** — demonstrating production-level ML deployment skills.

Tour Package Purchase Prediction | Machine Learning

- Built an end-to-end classification pipeline to predict customer purchase behaviour.
- Performed data cleaning, encoding, and feature engineering using **Pandas & NumPy**.
- Trained Logistic Regression and Random Forest; best performance with Random Forest, improving targeting strategy.

Indian Tour Packages Market Analysis | Python, EDA

- Scraped 9,400+ tour package listings (price, duration, discount, location, star rating) using BeautifulSoup.
- Cleaned and transformed unstructured text data with regex and pandas for structured analysis.
- Performed EDA to uncover pricing trends, destination popularity, and star rating distributions.
- Visualised regional travel patterns, service clusters, and anomalies using **Seaborn & Matplotlib** dashboards

ADDITIONAL INFORMATION

Certifications: Python, SQL, Power BI, ML, Data Science with Advanced GenAI — Innomatics Research Labs, Pune.

Awards & Achievements: Secured First Rank in Bachelor's Degree — awarded a Gold Medal by the college.
