

ROHIT GANESHE

AI/ML Engineer

✉ rohitganeshe0@gmail.com ☎ 9109081648 🌐 LinkedIn 🐙 GitHub 📁 Portfolio 📍 Pune

📄 PROFESSIONAL SUMMARY

AI/ML Engineer with 3+ years of professional experience developing and deploying Machine Learning, Deep Learning and Generative AI solutions. Skilled in Python, SQL, Scikit-learn, XGBoost, TensorFlow, LSTM, LangChain, RAG, FastAPI, Docker and MLflow. Experienced in predictive modelling, feature engineering, real-time ML pipelines, LLM applications, API development, cloud deployment and model monitoring.

📁 EXPERIENCE

AI ML Engineer

09/2023 – Present

Promoted from AI/ML Engineer-I to AI/ML Engineer-L1 in Apr 2026

Pune

- Develop end-to-end Machine Learning solutions covering data preprocessing, exploratory analysis, feature engineering, model development, evaluation and optimisation.
- Build predictive models using Scikit-learn, XGBoost, Random Forest, LightGBM and CatBoost for classification, prediction and anomaly-detection use cases.
- Develop Deep Learning and time-series solutions using TensorFlow/Keras and LSTM architectures.
- Build Generative AI applications using LLMs, RAG, embeddings, LangChain and vector databases.
- Develop REST APIs with FastAPI/Flask and containerise AI/ML applications using Docker and Kubernetes.
- Use MLflow for experiment tracking, model versioning and model registry, with monitoring and CI/CD practices for production workflows

🧠 SKILLS

Programming: Python, SQL

Machine Learning: Scikit-learn, XGBoost, CatBoost, Random Forest, Logistic Regression, Feature Engineering, Hyperparameter Tuning

Deep Learning: TensorFlow, Keras, CNN, LSTM, Transfer Learning

Generative AI: LLMs, RAG, LangChain, Prompt Engineering, Embeddings, Azure OpenAI, Hugging Face

Data & NLP: Pandas, NumPy, PySpark, NLP

API & Deployment: FastAPI, Flask, REST APIs, Docker, Kubernetes

MLOps: MLflow, Model Registry, Experiment Tracking, Model Monitoring, CI/CD

Cloud & DevOps: AWS EC2, AWS S3, AWS SageMaker, Azure ML, Git, GitHub, Jenkins, GitHub Actions

Databases & Vector DB: SQL, FAISS, Pinecone, ChromaDB

Explainable AI: SHAP, LIME, Grad-CAM

📁 PROJECTS

AI-Powered Predictive Maintenance Platform

Role: Machine Learning & AI Developer | Python, SQL, XGBoost, LightGBM, Random Forest, LSTM, Kafka, FastAPI, Docker, Kubernetes, MLflow, AWS

- Developed a predictive maintenance solution to predict equipment failures 7–14 days in advance using sensor and operational data.
- Created 150+ engineered features including rolling averages, temperature differences, pressure ratios, vibration index and maintenance intervals.
- Built failure prediction, anomaly detection and Remaining Useful Life (RUL) models using Random Forest, XGBoost, LightGBM, CatBoost and LSTM.
- Built a real-time pipeline using Kafka → feature engineering → prediction API → ML model → alert system.
- Implemented SHAP/LIME for explainability and MLflow for experiment tracking, model registry and versioning.

- Developed FastAPI services, deployed with Docker/Kubernetes, and monitored prediction performance, latency and model/feature drift.
- Reported results: 96.8% prediction accuracy, 94% precision and 93% recall.

Enterprise Generative AI Knowledge Chatbot

Role: ML/AI Developer – Generative AI | Python, LangChain, Azure OpenAI, Hugging Face, FAISS, Pinecone, FastAPI, Streamlit, Docker, Kubernetes

- Developed an enterprise RAG-based chatbot for querying internal policies, compliance documents and technical documentation.
- Built document ingestion, text extraction, chunking and embedding pipelines for enterprise content.
- Implemented semantic retrieval using FAISS/Pinecone and integrated LLMs through Azure OpenAI.
- Developed FastAPI backend services and a Streamlit interface with authentication and role-based access.
- Applied prompt engineering and response evaluation to improve answer quality and reduce hallucinations.

AI-Based Customer Churn Prediction System

Role: ML/AI Developer | Python, Scikit-learn, XGBoost, LightGBM, Random Forest, SQL, Flask, Docker, AWS, MLflow

- Developed classification models to identify customers at risk of churn using structured customer data.
- Performed data cleaning, EDA, feature engineering and model evaluation using Accuracy, Precision, Recall, F1-score and ROC-AUC.
- Applied GridSearchCV for hyperparameter tuning and compared multiple classification algorithms.
- Developed Flask REST APIs and deployed ML services using Docker/AWS.
- Used MLflow for model versioning and supported production model monitoring.

EDUCATION

Master of computer Application

10/2021 – 07/2023

SAGE University, Indore

BSC in Computer Science

07/2018 – 04/2021

DAVV University, Indore

ADDITIONAL INFORMATION

Certifications: Python, SQL, ML, Data Science with Advanced GenAI, Innomatics Research Labs, Pune.

Awards & Achievements: Gold Medalist — Secured First Rank in Bachelor's Degree

Languages: English · Hindi · Marathi
